INSTRUCTIONS TO TEST ENGINEERS:

How to find duplicate defects? (To make sure nobody else has logged the defect that you have found).

1. Check for any **duplicates before logging the defect**. You can tap on all other defects sections on the defects page to look into all the other defects logged by your companion tester
2. Use these words: keyword or module name or page or defect words related to your defect in the **search placeholder** on the **“All other defects”** page to get the duplicate defects. If you do not find any defects. Kindly create a new defect.

Please follow standard protocol to log any defects.

1. Have a valid screen recording of the defect.
2. Write a brief Summary of the defect
 - If it is RFE (Request for enhancement) Kindly write it as **RFE – Summary**.
 - If it is Inconsistent, Kindly write it as **Inconsistent – Summary**.
3. Write a detailed Description of the defect.
4. Attach Relevant Screen Recording of the defects.
5. Make sure to select valid severity and priority for the given defect. And provide relevant steps to reproduce the defects.
